Wall-mounted and Premise Enclosures

The Newton Data Rack (NDR) is a highly versatile, cost-effective premise equipment rack solution for both telecommunications and data requirements. The lightweight, easy-to-use design makes assembly and installation quick and easy. Kits are shipped unassembled in a secure package in order to maximize storage space and minimize shipping cost. Mounting hardware and assembly instructions are included in every kit.

Newton Vertical Cable Management (NVC) systems offer space-saving, high quality and lightweight cable management options. They are single-sided or double-sided, mount between equipment racks both Newtons and others, and all edges are protected against possible cable wear and abrasion. Available in narrow 3.65 and wide 6.00 widths and various heights. See ordering chart below.
