New Product Announcement

SymRack[™]

Newton Symmetric Equipment Rack

Get cabinet load capacity for an equipment rack price

Our revolutionary seismic equipment rack is Zone 4, Level 3 certified to hold a massive 1050 lbs.

Won't damage cables

Innovative upright design provides protective barrier between equipment mounting screws and cable raceway.

No more plastic edge protectors

Uprights also have rounded edges, no more plastic edge protectors.

Reduces installation time

Fully open base design allows free access to anchor bolts.

Reduces required part numbers and inventory

The symmetric design makes each rack installable as open or closed duct (front or rear cable access), reducing required part numbers and inventory.

Supports both data and telco standard equipment

Spacing between uprights is a full 1/4" more than conventional designs.

Patent Pending

No More Plastic Edge Protectors

GR-63 Core Compliant Base
